Stor y	TOO P-16 2	Done	Medium	Property Manager Login	300	300	0	0	795	795	-495	-495	-165	-165
Stor y	TOO P-16 3	Done	Medium	Tenant Login NOT COMPLETE	240	240	0	0	510	510	-270	-270	-112	-112
Stor y	TOO P-17 3		Medium	(Tenant Homepage) As a tenant, I can open Homepairs and automatically see details about my (from registration) property, so that I can quickly see information or updates.	210	210	0	0	360	360	-150	-150	-71	-71
Task	TOO P-17 9	Done	Medium	Travis CI / Unit Testing Research & Config	300	300	0	0	1235	1235	-935	-935	-311	-311
Stor y	TOO P-18 2	On Hold	Medium	(Back button) As a user, I want a back button, so that I can quickly and clearly return to the page I was on before view property.		45	0	0	75	75	-30	-30	-66	-66
Stor y	TOO P-18 3	Done	Medium	(Research UI testing - Jest /Enzyme) As a user, I want to have a unit-tested UI, so that I	195	195	0	0	360	360	-165	-165	-84	-84

				don't run into UI errors.										
Stor y	TOO P-18 4	Done	Medium	(UI + Functionlity) As a property manager, I can use the Homepairs app to create a new property, so that I can track repairs to properties new to the Roopairs network.		420	0	0	925	925	-505	-505	-120	-120
Stor y	TOO P-18 6	Done	Medium	(Database + API) As a property manager, I can use the Homepairs app to create a new property, so that I can manage repairs for properties new to the Roopairs network.	300	300	0	0	390	390	-90	-90	-30	-30
Stor y	TOO P-18 7			(UI + Functionality) As a property manager, I want to edit pre-existing properties, so that I can accurately reflect changes (incorrect input, rennovation, etc)	285	285	0	0	570	570	-285	-285	-100	-100
Stor y	TOO P-18 8	Done	Medium	(Database + API) As a property manager, I want to edit pre-existing properties, so that I can accurately reflect changes (incorrect input, rennovation, etc)	75	75	0	0	186	186	-111	-111	-148	-148
Task	TOO P-18 9	Done	Medium	Fix spacing betwen Roopairs button and Landlord-Tenant switch	60	60	0	0	60	60	0	0	0	0
Task	TOO P-19 O		Medium	Flexbox Fix for cutting pages short	120	120	0	0	180	180	-60	-60	-50	-50
Stor y	TOO P-18 O	Done		(Registeration w/ Pre-existing Roopairs account) As a user, I can register for Homepairs with my Roopairs account, so that my data	120	120	55	55	65	65	0	0	0	0

				is automatically transferred.										
Stor Y	TOO P-18 1	Done		(Registration generates a new Roopairs account) As a user, I can get a Roopairs account automatically when I register for Homepairs, so that I can save time from making one manually while also getting access to the Roopairs service provider network.	240	240	180	180	60	60	0	0	0	0
Stor y	TOO P-18 5	Done	Medium	(unique address) As a property manager, I can can only create property's with a unique address, so that no one else can list my property.	240	240	180	180	60	60	0	0	0	0
Epic	TOO P-17 7		Medium	Edit Property	360	360	360	360					0	0
Stor y	P-17 <u>8</u>	pted		(Sync Property CRUD between Homepairs & Roopairs accounts) As a user, I can see the same property from either my Homepairs or Roopairs account, so that I can work on one platform and not worry about the other	720		418		302	302	0	0	0	0
Stor y	TOO P-16 7	Done	Medium	PM Registration with Roopairs Account	420	840	420	600		842		-602	0	-71

Generated at 2/4/20 1:25 AM by Cesar Chacon using Jira 8.3.0#803001-sha1:679cb7fa408fb68a51f75b1cea4d16caf4d042ef.

- Analysis:

According to this graph generated by Jira Reports and edited by me (César) to reflect just this Winter Quarter, it is telling us that we have -23% accuracy. This is calculated by getting the Original Estimation and subtracting that with the actual amount of logged work. This gives us an accuracy amount, this amount is divided by the original estimation to give us the accuracy percentage for each task. We then calculate the overall accuracy from there which is -23% in our case. This is obviously not ideal. I believe the problem we are having is that we are not communicating well enough with our Jira Board manager, Sarah, about how much time we believe each task will take us, but instead we are letting her assign estimations. For the next sprint, we are being more careful about underestimating how long each task will take for each team member individually.
